

Lake Deidze

Україна, Дийдівське озеро

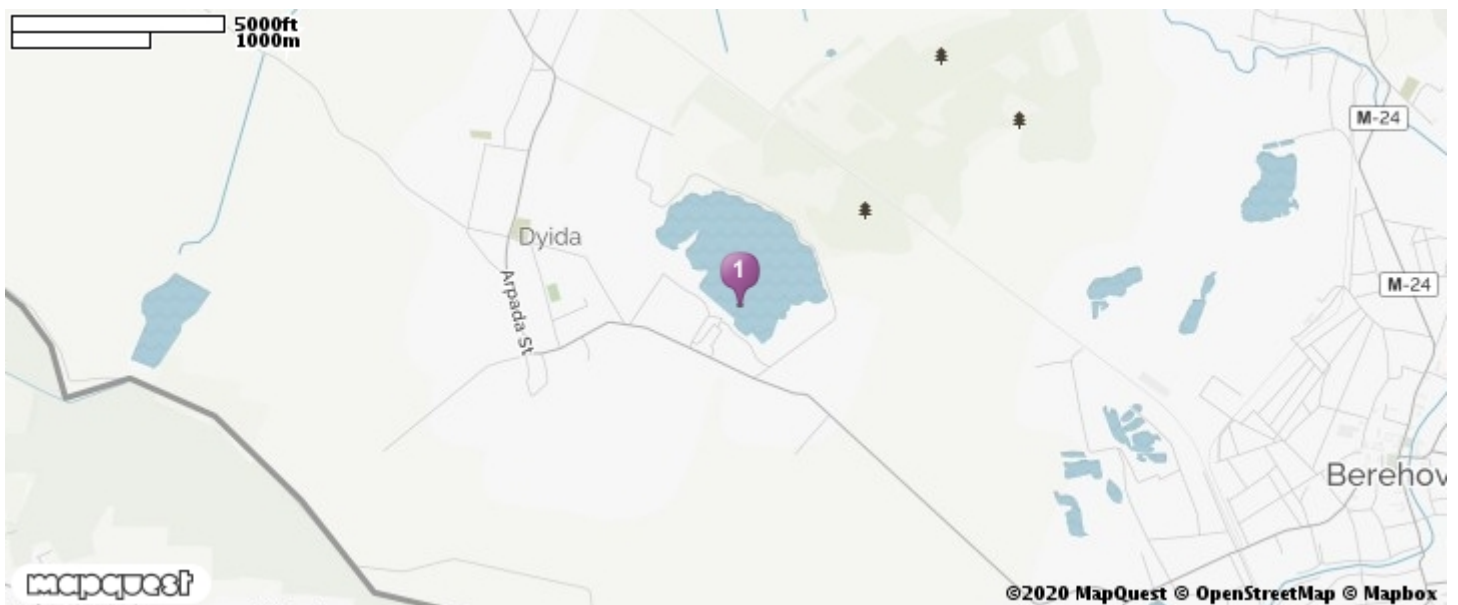

48.2144403982169, 22.58775392663665

Deidou Lake is a remnant of the Black Mochar Swamp, the site of a former sandy quarry. The name comes from the village of Dyda (formerly called Didovo), which is located a few kilometers west of the coast. Old-timers claim that a huge black snake with a long neck and thick body lives in the lake. On the basis of this description, it can be assumed that the deed monster is a relative of the world-famous monster from the Scottish lake Loch Ness. More information on the Legends of Dido Lake

Overview

Type: Park	Intention: Fun	Region: Ukraine
City: Dyyda village
